EXERCISE SCIENCE AND PRE-HEALTH PROFESSIONS

Chair: Joan Eckerson
Department Office: Kiewit Fitness Center, Room 225

Exercise Science is the study of the human body's metabolic and physiological response and adaptation to acute and chronic exercise. The coursework encompasses several disciplines including human anatomy, human physiology, exercise physiology, biochemistry, biomechanics, and nutrition that provide a framework for the development of exercise and nutrition-based intervention programs for disease prevention, enhanced human performance, and therapeutic rehabilitation. The Exercise Science & Pre-Health Professions major prepares students for admission into several health-related professional programs including physical therapy, occupational therapy, medicine, physician assistant, dentistry, accelerated nursing, and cardiopulmonary rehabilitation. The curriculum also prepares students to become nationally certified by the American College of Sports Medicine and the National Strength and Conditioning Association for employment as Certified Exercise Physiologists, Certified Personal Trainers, and Certified Strength and Conditioning Specialists.

Specific Requirements for Admission to Exercise Science and Pre-Health Professions

Enrollment is based upon the following requirements: A minimum of 30 credits in Creighton University coursework with a cumulative GPA of 2.75 or higher; a grade of "C" or better in CHM 203 General Chemistry I or CHM 204 General Chemistry I Laboratory or CHM 205 General Chemistry II or CHM 206 General Chemistry II Laboratory and BIO 202 General Biology: Cellular and Molecular/BIO 206 General Biology: Cellular and Molecular Laboratory or BIO 201 General Biology: Organismal and Population/BIO 205 General Biology: Organismal and Population Laboratory. Students apply for admission to the major through the College of Arts and Sciences website.

B.S., Major in Exercise Science and Pre-Health Professions requirements (43 credits)

Courses

EXS 125. First Aid. 2 credits. FA, SP, SU
American Red Cross Responding to Emergencies, and CPR/AED Professional Rescuers and Healthcare Certifications may be earned. Emphasis on recognizing an emergency and providing care until professional medical help arrives. Students should expect to pay an additional fee for first aid supplies used and Red Cross Certification fee.

EXS 142. Weight Training and Program Design. 1 credit. FA, SP
Applied principles, techniques and participation in weight training activity for both men and women. Lecture topics include explanations of the major muscle groups, safety issues, proper lift technique, and introduction to basic program design for improving muscular strength, hypertrophy, muscular endurance, and flexibility.

EXS 144. Aerobic Conditioning and Group Fitness. 2 credits. FA, SP
An introduction to fitness concepts and basic program design to attain and maintain cardiovascular fitness, flexibility, and muscular endurance for life through a variety of group exercise programs. Includes participation and instruction in high and low impact aerobic training, kickboxing, circuit and interval training, and other popular methods of group fitness training. Students lead a fitness class as part of course requirements.

EXS 151. Beginning Tennis. 1 credit. FA, SP
Instructional techniques, analysis, demonstration, and practice in the basic skills of tennis. Includes rules, selection and care of equipment, strategy on the court.

EXS 152. Intermediate Tennis. 1 credit. OD
Instructional techniques, analysis, demonstration, and practice in the intermediate skills of tennis. Some advanced strategies and skills. P. EXS 151 or IC.

EXS 161. Life Skills for Student Athletes. 1 credit. FA, SP
This course is designed to educate student-athletes in the dynamics of intercollegiate athletics through participation in all aspects of their respective sport, including conditioning, team drills and activities, academic enrichment, community service, and life skills training. Graded Satisfactory/ Unsatisfactory.

EXS 195. Introduction To Athletic Training. 3 credits. FA, SP
Cognitive and practical experiences designed to introduce basic athletic training principles and skills to students entering the field of sports medicine and other health care careers.

EXS 240. Foundations of Fitness and Wellness. 3 credits. FA, SP
This course provides an overview of exercise physiology, nutrition, biomechanics, sociocultural aspects of sport and exercise and other related topics, including career opportunities related to Exercise Science. Students are also introduced to fitness and wellness related concepts, activities, and skills necessary to evaluate personal fitness and develop a lifelong fitness program. Includes two lectures and two laboratories per week.

EXS 305. Therapeutic Modalities. 3 credits. OD
The purpose of this course is to educate the student pursuing a career in sports medicine in the basic principles of the use of therapeutic modalities as it relates to the athletic setting. An emphasis will be placed upon the practical use of these principles in the athletic training room setting in conjunction with associated program coursework. P. EXS 195, EXS 331 or IC.
EXS 306. Therapeutic Exercise. 3 credits. OD
The purpose of this course is to educate the student pursuing a career in Athletic Training in the basic principles of rehabilitation and specific therapeutic exercise techniques as they relate to the care of the physically active. Special emphasis will be placed upon the practical use of these principles and techniques in laboratory settings and in the collegiate athletic training room setting in conjunction with practical experience. P. EXS 195, EXS 331 or IC.

EXS 310. Practicum in Exercise Science. 1 credit. OD
Depending upon area of interest, provides students with practical experience in areas such as athletic training, fitness testing, personal training, strength and conditioning, and wellness programming with professionals affiliated with Creighton University. May be repeated three times. P. EXS major, Jr. stdg. and IC.

EXS 320. Human Physiology. 4 credits. FA, SP, SU
An undergraduate human physiology course providing detailed coverage on the normal function of the human organ systems, while also incorporating discussion on physiological changes during physical activity and certain diseases. Information is presented from the cellular level to the entire organism. Lecture, Lab course. P. BIO 202/BIO 206 or BIO 201/BIO 205; CHM 203/CHM 204 or CHM 205/CHM 206; EXS major or IC.

EXS 331. Human Anatomy. 0-4 credits. FA, SP, SU
Provides students with a basic knowledge of the structure and function of the human body. Lecture topics range from anatomical terminology to comprehensive overviews of the individual systems. Dissected cadaver specimens and anatomical models are used as learning aids. Lecture/Lab course. P. BIO 202/BIO 206 or BIO 201/BIO 205; CHM 203/CHM 204 or CHM 205/CHM 206.

EXS 334. Biomechanics. 4 credits. FA, SP
Introduction to the biomechanics of human movement. Study of the musculo-skeletal system with special emphasis on the application of physical laws and principles that govern movement of the body. Lecture/Lab course. P. EXS 331, EXS major, or IC.

EXS 335. Exercise Physiology. 0-4 credits. FA, SP
Study of the major physiological systems in the body and their response to acute and chronic exercise. Students will be introduced to laboratory techniques to assess body composition anaerobic power and cardiovascular fitness. P. BIO 202/BIO 206 or BIO 201/BIO 205; CHM 203/CHM 204 or CHM 205/CHM 206, EXS 240 and EXS 320 or IC; EXS major.

EXS 350. Nutrition For Health And Sports Performance. 3 credits. FA, SP, SU
Considerable information is provided regarding the six classes of nutrients. Lectures focus on applying knowledge in nutrition into a framework upon which performance and conditioning strategies can be based or from which recommendations can be made for health enhancement. P. Contemporary Composition; Oral Communication; EXS 320, EXS 335, EXS major or IC.

EXS 391. Career Preparation and Professionalism. 3 credits. FA, SP
Integrates knowledge and experiences from EXS courses and provides opportunities to critically discuss and analyze career issues and opportunities associated with health/wellness/fitness-related professions. Emphasis is given to acquainting students to professionals in EXS-related professions and strategies for being successful. P. EXS major; Junior or Senior standing; One Magis Core Oral Communication course.
**EXS 492. Exercise Science Internship. 1-4 credits. FA, SP, SU**

Students are to spend up to 20 hours per week working in one of several areas as such as: strength training and conditioning; employee/corporate fitness; or in one of the allied health professions (e.g., physical therapy, medicine, physician assistant, cardiac rehabilitation, etc.). Students will assume positions of responsibility and will demonstrate appropriate leadership skills and knowledge. Placement of students will be based upon their intended career path, course-work completed, grade point, and demonstrated leadership, and will be determined by the Internship Coordinator. Students who want to commit to 200 contact hours or 250 or 300 (summer only) should register for 3, 4 or 5 credit hours, respectively. P: Jr. stdg. EXS major or IC.

**EXS 493. Directed Independent Readings. 1-4 credits. OD**

May be repeated to a limit of four credits. P: Jr. stdg.; EXS Major; IC.

**EXS 495. Directed Independent Study. 1-4 credits. OD**

May be repeated to a limit of four credits. P: Jr. stdg.; EXS Major; IC.

**EXS 497. Directed Independent Research. 0-4 credits. FA, OD, SP**

Designed to provide students with the knowledge and skills necessary for conducting research in Exercise Science including review of literature, study design, subject recruitment, data collection, statistical analysis, and manuscript and/or poster presentation. Students may be required to complete university training in research ethics and education, and HIPAA requirements. May be repeated to a limit of 4 credits. P: Jr. stdg.; EXS Major; or IC.

**EXS 534. Neuromechanics Human Movement. 3 credits.**

This course integrates neurophysiology, physics, and biomechanics to explore how the nervous system controls the actions of skeletal muscles to produce human movement. P: PHY 201, PHY 205, EXS 331.

**EXS 535. Applied Immunology. 3 credits.**

An integrative approach toward understanding how immune function is altered in response to exercise and other stressors. The course will examine the fundamental principles of immunology from an applied, or human perspective. The current literature will serve as source material for study and discussion. P: BIO 202/206 and either EXS 320 or BIO 449 or IC.
