Biology

Chair: Mark Reedy, mreedy@creighton.edu
Associate Chair: Alistair Cullum, acullum@creighton.edu
Department Office: Hixson-Lied Science Building, Room 448

The Creighton Biology Department offers foundational and advanced courses across major subdisciplines of biology. Lecture and lab experiences are grounded in first principles. Modern facilities, faculty active in research and a commitment to mentoring students all contribute to a rich environment for developing a sound foundation in life science and opportunities to participate in original research.

Biological Specific Requirements for Admission to the Biology Major

- Completion of BIO 201 General Biology: Organismal and Population and BIO 202 General Biology: Cellular and Molecular with a grade of "C" or better in each, OR completion of one Biology lecture course at Creighton, 300-level or above, with a grade of "C" or better.

B.S., Major in Biology requirements: 33 credits

Upper Division Biology courses

Seven upper-division lecture courses in the major, which consists of 300-level and above BIO courses of three or more credits, except BIO 297, BIO 350, BIO 397, BIO 493, BIO 495 and BIO 497. These courses must include:

Five lecture courses at the 300- and/or 400-level, which must include at least one course from each of the following three areas:

Molecular/Cellular:

- BIO 317 Genetics
- BIO 362 Cell Structure and Function
- BIO 432 Immunology
- BIO 452 Microbiology
- BIO 462 Neurobiology
- BIO 464 Neurobiology of Disease
- BIO 467 Developmental Biology

Organismal:

- BIO 335 Zoology
- BIO 341 Botany
- BIO 371 Animal Behavior
- BIO 433 Vertebrate Comparative Anatomy
- BIO 439 Parasitology
- BIO 449 Physiology
- BIO 461 Entomology
- BIO 462 Neurobiology
- BIO 467 Developmental Biology

Population/Ecology/Evolution:

- BIO 315 Foundations of Ecology & Evolution
- BIO 383 Vertebrate Natural History

BIO 415 Evolution
BIO 439 Parasitology
BIO 471 Conservation Biology
BIO 481 Terrestrial Ecology
BIO 485 Aquatic Ecology

One 500-level "focus" course

Applicable courses are:

- BIO 501 Bioinformatics
- BIO 517 Current Topics in Genetics
- BIO 520 Genomes and Chromosomes
- BIO 532 Current Topics in Cellular and Molecular Biology
- BIO 539 Ecology of Zoonotic Diseases
- BIO 541 Current Topics in Plant Biology
- BIO 545 Plant Diversity and Evolution
- BIO 549 Environmental Physiology
- BIO 559 Current Topics in Physiology
- BIO 567 Current Topics in Neuroscience
- BIO 580 Current Topics in Ecology

One additional course of the student's choice. This course can be any upper-division BIO lecture course (EXCEPT BIO 350) or one of a select group of offerings by other departments. Please check with the Biology department for a list of currently approved courses.

Four laboratory courses

This requirement may be satisfied by any combination of 4 credit lecture + laboratory or 1 or 2 credit laboratory-only courses. Lecture + laboratory courses may apply simultaneously to both the lecture and laboratory requirements.

The following courses apply toward this requirement:

Lecture/Laboratory courses

- BIO 335 Zoology
- BIO 341 Botany
- BIO 433 Vertebrate Comparative Anatomy
- BIO 439 Parasitology
- BIO 461 Entomology
- BIO 467 Developmental Biology
- BIO 481 Terrestrial Ecology
- BIO 520 Genomes and Chromosomes
- BIO 545 Plant Diversity and Evolution

Laboratory-only courses

- BIO 318 Genetics Laboratory
- BIO 363 Cell Structure and Function Laboratory
- BIO 372 Animal Behavior Laboratory
- BIO 384 Vertebrate Natural History Laboratory
- BIO 419 Molecular Genetics Laboratory
- BIO 450 Physiology Laboratory
- BIO 453 Microbiology Laboratory
- BIO 463 Neurobiology Laboratory
- BIO 486 Freshwater Ecology Laboratory
In addition, one of the following may be used as the equivalent of a laboratory course: BIO 490 may be counted as one lab course if taken twice. BIO 497 may be counted as one lab course if: 1. At least six credits of 497 are taken over multiple semesters. 2. The research work is presented by the student at a regional or national scientific meeting. 3. The research work is also presented by the student as a poster at the Department of Biology Research Colloquium.

BIO 297 Directed Research, BIO 350 Fundamentals of Microbiology, BIO 397 Directed Independent Research (Extramural), BIO 492 Seminar in Undergraduate Classroom Instruction, BIO 493 Directed Independent Readings, and BIO 495 Directed Independent Study do not apply toward the major requirements. BIO 497 Directed Independent Research may be counted as one lab course as noted above.

Courses in departments other than Biology (such as CHM 371 Biochemistry of Metabolism) may be approved for non-laboratory biology major credit; a student may exercise this option for only one such course.

### Minor in Biology

The Biology minor introduces students to foundational and advanced courses across the major subdisciplines of modern biology. Lecture and lab experiences are grounded on fundamental principles. In addition to the General Biology courses, a diversity of life science topics are available in upper division courses at the cellular and molecular, organismal, and ecological and evolutionary biology levels. Students can design a study plan which allows an in-depth exploration of one area or a broader survey of several subdisciplinary areas of biology.

### Biology Minor requirements: 18 credits

</tr>
</tbody>
</table>

Ten additional credit in BIO courses numbered 300 and above.

### Teacher Certification

Students who plan to teach Biology in secondary schools should consult with the Education Department, the Biology Department, and the appropriate agency in the state in which they intend to teach.
