

UNDERGRADUATE CURRICULUM AND DEGREE AND CERTIFICATE REQUIREMENTS

University Learning Outcomes

The University Assessment Committee has articulated six university-level outcomes (<http://catalog.creighton.edu/general-information-about-creighton/mission-learning-outcomes-goals-objectives/>) that are common to all undergraduate, graduate, and professional student experience.

Undergraduate Degree Requirements

Knowledge and completion of all degree requirements is the responsibility of the student. To assist, Creighton provides advisor assistance and on-line degree evaluations.

The following degree requirements are required for a bachelor's degree:

- Minimum of 128 semester credit hours
 - minimum of 48 semester credit hours earned at Creighton, including the final 32
 - minimum of 48 semester credit hours in courses numbered 300 or above
 - minimum semester credit hours earned at Creighton in the major, as follows:
 - College of Arts and Sciences: minimum of 15
 - Heider College of Business: minimum of 15-18
 - College of Nursing: minimum of 20
 - College of Professional and Continuing Education: minimum of 15
 - Cumulative grade point average of 2.00
 - Completion of Magis Common Core Curriculum (see below) and applicable Magis College Core Curriculum (consult the respective College page)
 - Completion of major requirements
 - Submit application for graduation

Undergraduate Certificate Requirements

Persons who may not initially want to follow a bachelor's degree program may enroll in one of the undergraduate certificate programs. Those without prior college work may elect to complete a certificate program first and have the option of continuing with the complete degree program. (Courses required in most of the certificate programs meet some of the major requirements in the degree programs.) Others who have previously completed a

Bachelor's degree may want to enroll in a certificate program for personal enrichment or in order to show a concentration in another area of study.

Undergraduate certificate programs are offered in the College of Arts and Sciences, Heider College of Business, and College of Professional and Continuing Education.

A minimum GPA of 2.00 is required to earn an undergraduate certificate. A grade of "C" or better is needed in all courses to count toward

the certificate. No course may be taken Pass/No Pass. All course requirements will be taken at Creighton, as transfer credit is not allowed for certificate programs.

Individuals who want to enroll in a certificate program should complete an Application for Admission or current students may consult their Dean's Office.

Magis Common Core Curriculum

Note: The Magis Core Curriculum applies to students matriculating as an undergraduate degree-seeking student, Fall 2014 and after.

The Magis Core Curriculum serves as the cornerstone of Creighton University education, laying a shared foundation for all undergraduate students in order to shape responsible citizens of the global community. In the Jesuit tradition, Magis is "the more", aspiring toward excellence. As Catholic, the Magis Core Curriculum provides a framework to challenge students to pursue truth in all forms through the living tradition of the Catholic Church. As Jesuit, the Magis Core Curriculum is deeply rooted in Ignatian values and the Jesuit intellectual tradition, engaging students through intimate learning communities in critical dialogue about the ultimate questions of life.

The components that constitute the Magis Core Curriculum are intentionally selected to provide a congruous liberal educational experience for all undergraduate students. Students across all colleges interact, challenge ideas, and gain a deeper appreciation for diverse perspectives and experiences, thus promoting a culture of inquiry and mutual respect. A variety of course delivery methods, including distance education, are designed to foster student engagement. The Magis Core Curriculum promotes students' ethical reasoning and critical thinking, and prepares students to respond to life's challenges with discerning intelligence and thoughtful reflection. Committed to the inherent worth and dignity of each person, students gain an appreciation of ethnic and cultural diversity in all its forms, and develop a commitment to exploration of transcendent values and the promotion of justice.

The Magis Core Curriculum is organized into four levels, with various Components in each level. Each College may designate additional College Core Components. Students must earn the designated number of credits in each Common Core and College Core categories using approved courses. Only courses successfully completed with credit earned from a passing grade may fulfill the required coursework.

The most up-to-date list of courses that satisfy each Foundations, Explorations, Integrations or Designated Course requirement of the Magis Core Curriculum is available in the Course List for that level of the Magis Core Curriculum, linked above.

Foundations	Explorations	Integrations	Designated Courses (1 course each)
Contemporary Composition (3 credits)	Understanding Natural Science (2 credits)	Intersections (3 credits)	Designated Ethics
Critical Issues in Human Inquiry (3 credits)	Understanding Social Science (3 credits)		Designated Oral Communications
Oral Communication (1 credit)	Global Perspectives in History (3 credits)		Designated Written Communication

Mathematical Reasoning (2 credits)	Literature (3 credits)	Designated Statistical Reasoning
Philosophical Ideas (3 credits)	Ethics (3 credits)	Designated Technology
The Christian Tradition (3 credits)	The Biblical Tradition (3 credits)	

Foundations

The Foundations components are foundational in several ways. First, they insure that students have foundational skills in self-expression, that is, in writing and in speaking. Second, students are introduced to three domains of critical thinking that have, from the beginning of the Jesuit educational tradition, been seen as foundational: (a) thinking critically about human experience through the study of history and literature; (b) thinking critically about religion through the study of theology; and (c) thinking critically about thinking itself through the study of philosophy. The Foundations components should normally be completed within the first year of undergraduate study.

Contemporary Composition (3 credits)

This component introduces students to the essentials of academic writing. While themed around specific topics (see examples below), all courses will present the theory and the practice of rhetoric and composition, teaching students how to construct well-organized and well-supported arguments. PREREQUISITE: None. Consult the Foundations Course List (p. 4) for a complete list of Contemporary Composition courses.

Critical Issues in Human Inquiry (3 credits)

This multi-disciplinary component of the first-year experience will introduce students to significant questions in humanistic scholarship through a high-impact educational experience. Critical Issues in Human Inquiry courses emphasize critical and creative thinking, written and oral communication, and engagement with diversity and social justice. COREQUISITE: Oral Communication. Consult the Foundations Course List (p. 4) for a complete list of Critical Issues in Human Inquiry courses.

Oral Communication (1 credit)

The Oral Communication component introduces the subject matter of how to give a speech and lays the foundation on which students can then build a speaking competency. Argument construction (and fallacies), speech organization, verbal and visual support, use of technology, delivery, audience analysis, topic selection, research, information literacy and *eloquentia perfecta* would all be covered. Students will deliver speeches in their Critical Issues in Human Inquiry course based on what they have learned in their Oral Communication course. COREQUISITE: Critical Issues in Human Inquiry course. Consult the Foundations Course List (p. 4) for a complete list of Oral Communication courses.

Mathematical Reasoning (2 credits)

The Mathematical Reasoning component is (1) problem-based in that it explicitly discusses real-world applications of mathematics relevant to students in business, nursing, the humanities, social sciences, or natural sciences, depending on the intended audience; and (2) focuses on communicating mathematically in myriad forms. PREREQUISITE: None.

Consult the Foundations Course List (p. 4) for a complete list of Mathematical Reasoning courses.

Philosophical Ideas (3 credits)

The Philosophical Ideas component explores philosophical ideas about the nature of reality, the scope of human knowledge, and the nature of a good human life through the study of primary philosophical texts. Students will study the theories and concepts that philosophers of the Western tradition have used to explore such ideas. The course will culminate in students' developing and defending their own answers to some of the philosophical questions explored in the course. PREREQUISITE: None. Consult the Foundations Course List (p. 4) for a complete list of Philosophical Ideas courses.

The Christian Tradition (3 credits)

The Christian Tradition component gives students a first taste of the lively, complex, and often tumultuous ways that Christians have, over the centuries, sought to bring critical reason to the understanding of their faith. It surveys the major teachings, history, practices, and personalities of the Christian tradition; it sets these out within a balanced account of the three principal traditions of contemporary Christianity (Orthodox, Catholic, Protestant). PREREQUISITE: None. Consult the Foundations Course List (p. 4) for a complete list of The Christian Tradition courses.

Explorations

The life of the mind requires exploring, and at this level, students are asked to begin exploring widely. The genius of the university is its wide-ranging and enormously sophisticated array of disciplines. In this phase of study, students begin to explore that array, its vast and varied approaches to the profound reaches of human knowledge. All students have certain intellectual strengths that feel natural to them. All too often, students can be reluctant to explore more widely, to move outside their comfort zones. This level of exploration will push students to discover new domains and to uncover their own often hidden capabilities. The Explorations components should normally be completed within the first three years of undergraduate study.

Ethics (3 credits)

An essential first step toward helping students to become men and women for others in order to create a better, more just world is the critical study of various fundamental philosophical or theological theories about the nature and sources of moral obligation, moral virtue, justice, wisdom, and a good human life. The Ethics component involves both the study of fundamental moral theories and the use of those theories in complex practical situations. PREREQUISITE: Philosophical Ideas course. Consult the Explorations Course List (p. 5) for a complete list of Ethics courses.

Global Perspectives in History (3 credits)

The Global Perspectives in History component will introduce students to the distinctive disciplinary methods of historical inquiry with the intention of guiding them toward the ability to explain how significant historical developments have shaped human societies and cultures. Global Perspectives in History courses will offer a broad view of the past that supports an examination of change and continuity over a significant period of time; link particular regions with larger chronological and geographical trends in history; and analyze a combination of relevant thematic concerns such as race, gender, nation, politics, and economy. PREREQUISITE: Critical Issues in Human Inquiry course. Consult the Explorations Course List (p. 5) for a complete list of Global Perspectives in History courses.

Literature (3 credits)

Through an in-depth look at a specific period, form or theme in literature, the Literature component will examine how imaginative language represents and shapes the richness of what it means to be human. Attention will be paid to the transformative power of the human imagination and the role of the imagination in how we understand and explain our world. PREREQUISITE: Critical Issues in Human Inquiry course. Consult the Explorations Course List (p. 5) for a complete list of Literature courses.

The Biblical Tradition (3 credits)

The Biblical Tradition component introduces students to the Bible, the Old and New Testaments, through the discipline of Biblical Studies. It examines the central narratives of the Bible, but its unique emphasis is on introducing students to the sophisticated historical, social-contextual, and critical methodologies that shape any contemporary interpretation of the Bible. PREREQUISITE: The Christian Tradition course. Consult the Explorations Course List (p. 5) for a complete list of The Biblical Tradition courses.

Understanding Natural Science (2 credits)

The Understanding Natural Science component helps students to understand the nature of science, the strengths and limitations of the scientific approach, the differences between science and other ways of understanding the world, the key role of science in technological developments and *vice versa*, and the mutual influence of science and society on each other. PREREQUISITE: None. Consult the Explorations Course List (p. 5) for a complete list of Understanding Natural Science courses.

Understanding Social Science (3 credits)

The Understanding Social Science component introduces students to social science through courses that begin with an overview of what it means to “understand social science” as the study of society and human nature using theories and quantitative or qualitative analysis of data, and then present in detail fundamental concepts and theories from at least one social scientific discipline. PREREQUISITE: None. Consult the Explorations Course List (p. 5) for a complete list of Understanding Social Science courses.

Integrations

As students approach completion of their undergraduate education, they need to begin to integrate what they have learned about themselves and their world. At this stage of undergraduate study, students’ programs of study will have diverged into various specialized fields of study in the various colleges and schools of the university. Different forms of integrative study will be appropriate depending upon in which college the student is enrolled. Integrations components will normally be completed within the third and fourth years of undergraduate study.

Intersections (3 credits)

The focus of the Intersections component will be on big questions that employ critical thinking skills to address issues of diversity, service, and social justice. Students and instructors will work at the intersection of intellectual inquiry and personal experience as they seek together to understand intersections in the world at large. In the best Ignatian tradition, these courses will involve research and writing as well as reflection, collaboration, and debate. PREREQUISITE: Critical Issues in Human Inquiry course and senior standing. Consult the Integrations Course List (p. 7) for a complete list of Intersections courses.

Designated Courses

In addition to the components of the Magis Core Curriculum listed above, students must complete 5 designated courses, 1 in each of 5 different areas. It is expected that students will complete most of these designated courses as part of their major programs of study. The rest of these courses should be completed as part of another Explorations- or Integrations-level component of the Magis Core Curriculum.

Designated Ethics (0 additional credits)

Courses that receive a designation in ethics will develop and integrate ethical thinking in a chosen academic discipline, profession, or sphere of responsibility. Each such course will involve at least one significant assignment that requires structured ethical reflection on some dimension of the student’s current or future projects. PREREQUISITE: Ethics course.

Consult the Designations Course List (p. 9) for a complete list of Designated Ethics courses.

Designated Oral Communication (0 additional credits)

Designated Oral Communication courses will involve intensive instruction in at least one form of oral communication that is specifically intended for a particular audience. Each such course will involve at least one significant oral communication assignment. PREREQUISITE: Oral Communication course. Consult the Designations Course List (p. 9) for a complete list of Designated Oral Communication courses.

Designated Statistical Reasoning (0 additional credits)

Designated Statistical Reasoning courses will involve intensive instruction and the application of statistical methods in solving problems within a discipline. Each such course will involve at least one significant assignment or project that utilizes statistics as an essential tool for analyzing data and drawing well-founded conclusions. The goal is to equip the student with the theory and methodology that are essential to solving problems in a data-rich world. PREREQUISITE: Mathematical Reasoning course. Consult the Designations Course List (p. 9) for a complete list of Designated Statistical Reasoning courses.

Designated Technology (0 additional credits)

Designated Technology courses will involve intensive instruction and the application of technology in solving problems within a discipline. Each such course will involve at least one significant assignment or project that utilizes technology as an essential tool for information gathering, analysis, and presentation. Beyond the simple use of a search engine or word processing program, students will effectively use discipline-specific software tools, as appropriate, and reflect on the role of technology in that discipline. In conjunction, students will explore the power and limitations of technology in both professional and societal terms. PREREQUISITE: None. Consult the Designations Course List (p. 9) for a complete list of Designated Technology courses.

Designated Written Communication (0 additional credits)

The goal of Designated Written Communication courses is to help students develop writing skills that are appropriate to a specific discipline, which will normally be the student’s major field of study. Designated Written Communication courses must be upper-division courses that involve intensive instruction in at least one form of writing oriented toward a specific audience; at least one significant written assignment, on which the student receives substantial instructor feedback during the drafting and revision stages; and an introduction to the practice of sustained professional writing in a field and the best

practices and conventions in that field. PREREQUISITE: Contemporary Composition course. Consult the Designations Course List (p. 9) for a complete list of Designated Written Communication courses.
